USAID/UK aid Transparency and Accountability in Public Administration and Services/TAPAS Activity

The TAPAS Activity, run by Eurasia Foundation, supports Ukrainian citizens and the Government of Ukraine to tackle corruption through eProcurement, eServices and Open Data. Since 2016, TAPAS has provided financial and expert support to advance technical solutions, improve legislation, and conduct educational activities to ensure sustainable development in all three areas.

FIVE YEARS OF TAPAS

eProcurement

$7 billion

savings in public funds through the **Prozorro** public eProcurement system. TAPAS is the largest technical and financial contributor to Prozorro.

500

procurement professionals improved their skills at the Kyiv School of Economics Centre of Excellence in Procurement, created by TAPAS. Today, the Centre is a fully self-sufficient institution.

17 legal acts

prepared with TAPAS assistance to ensure transparency and accountability in public spending and to increase market competition. The new Law on Public Procurement, in force since the spring of 2020, has already helped save

$165 million
in public funds

DOZORRO

portal and public procurement watchdog network helped NGOs analyze 40,000 high-risk, potentially-corrupt tenders and identified 35,000+ violations. As a result, 9,500+ tenders totaling more than

$37 million

have been either cancelled/amended by public purchasers or illegal tender decisions were reversed.

Establishment of the Medical Procurement of Ukraine State Enterprise to ensure transparent and efficient medical procurement. From June 2020 to October 2021, the entity reduced the cost of public-procured medicines and medical goods, saving

$169 million

Open Data

1 000 data sets

Adoption of a new iteration of Cabinet of Ministers Decree No. 835, which requires more than 1,000 data sets to be published by public authorities, significantly improving government transparency and public access to information.

26 projects received nearly $450,000

in grants to develop open data-based tools that solve social problems and eliminate corruption.

15 educational programs

and establishment of the **Diia.Open Data portal**, which together contribute to expanding meaningful open data policy nation-wide, provide opportunities for public monitoring and ensure sustainable growth of the open data community.

Almost 5 million

people freely use government data via the modernized **Unified State Open Data Web Portal**. In recent years, the number of new users has doubled annually.

17th place

in the European Open Data Maturity Report ranking for 2020, which ranks European countries' progress in advancing open data publication and use, a key TAPAS priority. Included for the first time, Ukraine was named a "fast-tracker" and scored 84% in open data maturity, well above the European average of 78%.

eServices

39 public services

transformed to online format. Digitization of services triggered reforms across entire industries, such as the construction and social sectors.

Development and support of the **Diia eServices platform**, which is used by more than

8 million
Ukrainians

More than 1.5 million

users of the **Driver's Web Portal**, which simplifies obtaining public services and minimizes corruption violations in the transportation sector.

24

registers integrated into **Trembita**, the national digital information interaction system. Trembita allows instant government sharing of information instead of having to request it each time from citizens; people receive public services transparently and without bribes.

More than $3 million

in potential savings per year via six eServices in construction, transportation, environment, and fire safety management, with an expected anti-corruption impact of

$28 million
